Re: Policy Statement
Sale of scrap metal

Occasionally, a request is received from a customer to procure some item(s) from the scrap metal pile. *It is the policy of the facility that no material may be removed from the Transfer Station without the approval of the office manager.*

Further, it is the policy of the facility that no one can scavenge from the scrap metal pile for such materials as copper, aluminum, or any other metal that may be of specific value.

However, should a customer notice any particular item(s) that would be a usable item(s) for that individual, a request to take said item(s) may be made to the office manager.

If the office manager approves, then a charge will be made equal to 125% of the per ton current price for scrap. Smaller items difficult to weigh will have a minimum charge assessed of \$5.00.

Payment must be made prior to taking the item(s) from the facility.

Stephen Patterson
Director
